MONTHLY DIGEST OF STATISTICS

No. 272

AUGUST 1968

This *Digest* has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

2. The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

3. The figures in the *Digest* are mainly totals for calendar months or monthly averages.

4. Some of the figures included in this *Digest* are provisional only and may be revised in later issues.

Definitions

5. A *Supplement of Definitions and Explanatory Notes*, published with the January issue, gives detailed definitions of all the terms and units used in the *Digest*.

6. The following general definitions should be noted in using the *Digest*:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Units of measurement.

Ton = long ton of 2,240 lb.

Gallon = imperial gallon.

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are normally defined in detail in the *Supplement to the Digest*. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

7. *Symbols.* The following symbols are used throughout:

.. not available.

— nil or less than half the final digit shown.

* average (or total) of five weeks.

8. *Change of basis.* A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

9. *Rounding of figures.* In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Central Statistical Office,
Great George Street, S.W.1.

CONTENTS

	Table	Page
I. National income and expenditure		
Expenditure on the gross domestic product	1	4
Factor incomes in the gross national product	2	5
Index numbers of output at constant factor cost	3	6
Personal income, expenditure and saving	4	7
Consumers' expenditure	5	8
Value of physical increase in stocks and work in progress	6	9
Gross domestic fixed capital formation	7	10
Fixed capital expenditure in manufacturing industry	8	12
Fixed capital expenditure in the distributive and service industries	9	13
II. Population and vital statistics		
<i>De facto</i> or home population	10	14
Age distribution of the population	11	14
Births, marriages and deaths registered	12-13	15
III. Labour		
Distribution of working population in Great Britain	14	16
Employees in employment in Great Britain	15	17
Numbers employed in agriculture	16	22
Civil Service: Non-industrial staff	17	23
Constructional work: Operatives employed by contractors	18	24
Overtime and short-time worked by operatives in manufacturing industries	19	24
Registered unemployed	20-25	25
Employment vacancies filled and unfilled	26	29
Industrial stoppages	27	30
IV. Social services		
National insurance and family allowances	28	31
National assistance grants and Supplementary benefits: pensions and allowances	29	32
National health service	30	33
V. Agriculture and food		
Crops and grass: Area and harvest	31	34
Livestock, pigs and poultry on agricultural holdings	32-33	35
Production, disposals and stocks of principal foods and feedingstuffs	34-42	36
Tobacco	43	42
Alcoholic drinks	44	43
Estimated household food expenditure and consumption in Great Britain	45	44
VI. Industrial production		
Index of industrial production	46	46
VII. Fuel and power		
Coal: production, consumption and stocks	47-51	48
Coke: production, disposals and stocks	52	52
Production of gas	53	53
Generation of electricity	54-55	54
Petroleum and petroleum products	56-61	56
VIII. Chemicals		
Fertilizers	62	59
Sulphur and sulphuric acid	63	60
Synthetic dyestuffs, colours, paint and varnish	64	61
Synthetic resins and plastics materials	65	62
Other miscellaneous products	66	62
IX. Metals, engineering and vehicles		
Iron and steel	67-69	63
Non-ferrous metals	70-71	65
Mechanical and electrical engineering products	72-83	66
Radios, radiograms and television sets	84	72

	Table	Page
Deliveries of electrical equipment and appliances	85	73
Merchant shipbuilding	86-87	74
Vehicles	88-91	76
Aero-engines and aircraft	92	79
Locomotives and railway rolling stock	93	79
X. Textiles and other manufactures		
Textiles and hosiery	94-98	80
Leather and footwear	99-100	82
Timber and paper	101-104	83
Rubber and other manufactures	105-107	86
XI. Construction		
Constructional work: Output and new orders	108-109	88
Industrial building in Great Britain	110	90
Building materials and components	111	91
Permanent housing	112-113	92
Educational building in Great Britain	114	94
XII. Retailing and catering		
Index numbers of retail sales and stocks in Great Britain	115	96
Index numbers of turnover in the catering trades	116	97
XIII. Transport		
Road and rail transport	117-123	98
Civil aviation	124	103
Merchant shipping	125-126	105
Passenger movement by sea and air	127-128	106
XIV. External trade		
Value and volume	129-131	108
Analysis by source and destination	132-133	111
Imports and exports of selected commodities	134-140	113
XV. Overseas finance		
Balance of payments	141	117
Reserves and net liabilities in sterling and in other currencies	142	118
XVI. Home finance		
Consolidated Fund and National Loans Fund	143-144	119
Central government Net balance	145	120
Inland Revenue and Customs and Excise duties	146	121
Capital issues and redemptions	147	122
Bank of England	148	123
London clearing banks and Scottish banks	149-150	124
Bank advances	151	126
Bank clearings and currency circulation	152	128
Discount market	153	129
Hire purchase and other Instalment credit	154	129
National savings	155	130
Security prices and yields	156	131
XVII. Wages and prices		
Average earnings and hours worked	157-160	132
Indices of wage rates and normal weekly hours	161-162	136
Changes in basic weekly wage rates	163	138
Import and export unit value index numbers; tramp shipping freights	164	139
Index of retail prices	165-166	140
Index numbers of wholesale prices	167	142
Index numbers of agricultural prices	168	144
XVIII. Entertainment		
Broadcast receiving licences, cinemas and gramophone records	169	145
XIX. Weather		
Temperature, rainfall and sunshine	170	146

(1) Equals total final expenditure on goods and services at market prices less imports of goods and services less taxes on expenditure plus subsidies. Estimates of the gross domestic product at constant factor cost based on statistics of output are given in Table 3.

(2) Including an allowance for the difference in timing between the estimates of stock-building and the recording of exports.

(3) This represents taxes on expenditure less subsidies valued at 1958 rates.

(¹) The method of compiling these estimates was described in an article in the February 1966 issue of *Economic Trends*.

(²) Estimates of the gross domestic product obtained from statistics of expenditure are given in Table 1.

(³) Monthly figures and figures for individual manufacturing industries are given in Table 46.

⁽¹⁾ Figures of total working population, total in civil employment, employers and self-employed and total employees in employment, have been obtained by the method described on pages 207-214 of the May 1966 issue of the *Ministry of Labour Gazette*.

⁽²⁾ The figures for June 1964 (a) and the corresponding figures for earlier months are not strictly comparable with those for June 1964 (b) and later months which are on the revised basis of calculation (see pages 110-112 of the March 1966 issue of the *Ministry of Labour Gazette*).

⁽³⁾ Between June 1966 and June 1967 the industrial classifications of many establishments were corrected. The estimates for June 1967 take account of these reclassifications and the figures for individual industries are therefore not comparable with those published for previous mid-years. Two sets of estimates are given for June 1966 i.e. (a) excluding the effects of reclassifications (for comparison with earlier estimates) and (b) including the effects of reclassifications (for comparison with subsequent estimates). Please see the article on pages 206-215 of the March 1968 issue of the *Ministry of Labour Gazette*.

⁽⁴⁾ Figures after June 1967 for industry groups and the totals for the index of production industries and manufacturing industries are provisional and may be revised after the count of National Insurance cards at mid-1968.

⁽⁵⁾ Owing to reclassification, figures for 1963 are not strictly comparable with those from 1964 onwards. See page 59 of the February 1965 issue of the *Ministry of Labour Gazette*.

	June	39.3	49.8	87.5	68.5	73.9	19.8	40.3	25.5	17.8	21.6

(1) All figures relate to mid-month. The figures in square brackets relate to the *Standard Industrial Classification, 1958*, Minimum List Headings. Figures after June 1967 are provisional and may be revised after the count of national insurance cards at mid-1968.

(2) See footnote (2) to Table 14.

(3) Between June 1966 and June 1967 the industrial classifications of many establishments were corrected. The estimates from June 1967 onwards take account of these reclassifications and are therefore, not comparable with those for earlier years. In order to provide a link, revised estimates for June 1966, incorporating the effects of reclassification, are being calculated and will be published in a subsequent issue.

Source: H.M. Treasury

(1) Established and unestablished staff, excluding employees of the Northern Ireland Government. In arriving at the totals two part-time workers are counted as one whole-time worker.

(2) Casual or seasonal staff recruited for periods normally of less than six months. These are included in the total and other columns.

(3) From April 1965 the figures include Post Office grades previously classified as Industrial.

(4) In April 1963 certain staff were transferred from Defence Departments to the Ministry of Public Building and Works.

(5) Ministry of Pensions and National Insurance and the National Assistance Board before October 1966.

(6) Ministry of Aviation up to January 1967. In February 1967 the functions of the Ministry of Aviation were taken over mainly by the Ministry of Technology (which was formed in October 1964).

(7) In July 1966 certain staff of the Ministry of Aviation were transferred to the Board of Trade.

(8) Including the Ministry of Technology up to January 1967.

Note: Between June 1966 and June 1967, the industrial classifications of many establishments were corrected. The estimates from January 1967 onwards have been revised to take account of these changes in industrial classification and also to take account of information obtained from the June 1967 count of National Insurance cards.

(¹) Figures relate to establishments with more than 10 employees in all manufacturing industries except shipbuilding and ship repairing.

(²) Excluding maintenance staff.

(¹) Stoppages involving fewer than 10 workpeople or lasting less than one day have been omitted except any in which the total number of working days lost exceeded 100. The figures for 1968 are provisional.

(²) The analysis by industries is based on the revised *Standard Industrial Classification 1958*.

(³) Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.

(⁴) The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages in progress in that period, whether the stoppages began in that period or earlier.

(¹) Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month. (²) Including prescribed industrial disease. (³) Yearly figures are averages of twelve monthly figures. Monthly figures up to January 1966 relate to the third Tuesday of the month; later figures relate to the first Tuesday and are estimated by a new method following changes in the medical certification arrangements. (⁴) These figures include substantial numbers of persons who have been sick for a long time and who may no longer be in employment. (⁵) Yearly figures are averages of quarterly figures. Quarterly figures relate to first Monday in February, May and November and last Monday in July. (⁶) Including a diminishing number of widows with pensions of 30s. a week derived from the old Contributory Pensions Acts. About 77,000 such pensions were being paid in June 1966. (⁷) Before 5 August 1957 widow's pension was converted to retirement pension at age 60; since that date widow's pension continues to age 65 or date of retirement if earlier. (⁸) The yearly figures relate to the end of January in the following year up to 1963, and to the end of December from 1964. (⁹) Including the elder or eldest child for whom no allowance is payable. (¹⁰) Average of twelve months March 1966 to February 1967. *Average of five weeks.

Flowers, nursery stock and bulbs	34	34	34	34	33				
Other crops	22	21	18	34		36	35	39	54
Bare fallow	199	167	262	229	233				
Lucerne⁽⁷⁾⁽⁸⁾	63	54	47	37	45	85	68	89	65
Temporary grassland⁽⁹⁾	6,823	6,518	6,233	5,934	5,918				
For mowing ⁽⁹⁾	3,440	3,150	2,941	2,852		5,364 ⁽¹⁰⁾	4,646 ⁽¹⁰⁾	4,676 ⁽¹⁰⁾	4,705 ⁽¹⁰⁾
For grazing	3,383	3,368	3,292	3,082					
Permanent grassland: Total	12,305	12,138	12,199	12,328	12,265				
For mowing ⁽⁹⁾	3,232	3,078	3,018	2,998		4,219	3,822	3,880	3,933
For grazing	9,072	9,060	9,181	9,330					
Rough grazings (including common rough grazings)⁽¹¹⁾	17,927	17,830	17,718	17,639					

(¹) Excluding agricultural holdings of one acre or less in extent in Great Britain. In Northern Ireland excluding holdings of less than one acre. (²) Beans only. (³) Gross production figures are shown. (⁴) Includes some production diverted from green peas. (⁵) Weight in pod. (⁶) Shelled weight. (⁷) England and Wales only. (⁸) Production figures relate to hay only. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed; the production of hay in Scotland and Northern Ireland is calculated from the area cut for hay only and does not include grass mown for silage or drying. (⁹) Clover and rotation grasses. (¹⁰) Including hay from permanent grass in Scotland. (¹¹) Including the total area of deer forest land in Scotland.

⁽¹⁾ Based on returns from Potato Marketing Board and Ministry of Agriculture, Northern Ireland.

⁽²⁾ As refined sugar.

⁽³⁾ Including quantities processed and fed to livestock under schemes for implementing the Agriculture Act, 1947, and seed sold for food.

⁽⁴⁾ Disposals (excluding seed and chats) of home grown and imported potatoes for human consumption, processing, export and sales for stockfeed through schemes for implementing the Agriculture Act, 1947.

⁽⁵⁾ Including sugar used in the manufacture of other foods.

⁽⁶⁾ Imported and home produced supplies of refined and raw sugar. Supplies held by the British Sugar Corporation and by refiners in the United Kingdom are included.

⁽⁷⁾ 53 week period (except for potatoes).

* Five week period.

⁽¹⁾ This index provides a general measure of monthly changes in total industrial production. The unadjusted index allows for variations in the length of calendar months so that it gives the average weekly rate of production in each month. The seasonally adjusted index allows for holidays and regularly recurring seasonal movements.

As some of the figures on which the index is based are available only with considerable delay, the index numbers for the last few months are always liable to be revised. Industries are grouped according to the *Standard Industrial Classification, 1958*.

⁽²⁾ For an index of construction (new work only) for Great Britain, see Table 108.

⁽³⁾ Provisional.

(1) Stocks held in Northern Ireland are excluded.

(2) Including shipments to Northern Ireland and the Channel Islands.

(3) Figures before 1963 included coal for foreign bunkering.

(4) From July 1963, the opencast figures include the production of certain licensed sites previously included in the deep mined figures.

* Average of five weeks.

(1) Mines operated by the National Coal Board which account for about 99 per cent of the total output. Changes in the basis of the recorded figures have occurred from time to time making comparisons difficult. The figures given in this table have therefore been adjusted where necessary to conform throughout to the current definitions given in the *Supplement of Definitions and Explanatory Notes*.

(2) From April 1966, attendances at training and other non-operational activities are excluded.

* Average of five weeks.

(¹) Excluding coke breeze.

(²) Excluding coke used for heating retorts at gas works.

(³) Including shipments to Northern Ireland.

(⁴) Figures relate to actual shipments made in each period and owing to the time lag between the date of shipment and the notification to H.M. Customs they differ from the figures published in the *Trade Accounts*.

*Average of five weeks.

(1) Excluding quantities used for production of steam for sale. In 1967, 255,000 tons of coal and 15,000 tons of oil were used for that purpose.

(2) Including generation by oil engine, refuse destructor, and waste heat.

(3) Including purchases from industrial producers whose generation is shown in Table 55, and net imports from France.

(4) Annual figures relate to the maximum load occurring near the end of the year or early in the following year.

(¹) Excluding the fuel industries which produced:

Million kilowatt hours

Source: Ministry of Power

Coal mines (1966/67)	747
Gas works (1966/67)	179
Mineral oil refining (1967)	696

These industries accounted for an average weekly production of about 29 million kilowatt hours in 1966 as compared with 324 million kilowatt hours produced weekly in 1966 by the industries included in the table.

(²) Including non-ferrous metal manufacture and industries covered by Orders VI-IX of the *Standard Industrial Classification*, 1958.

(³) Electricity supplied by United Kingdom Atomic Energy Authority prototype reactors to the public electricity supply system.

*Average of five weeks.

(1) Excluding natural gas.

(2) From January 1968 agency pick-up sales are included under dealers, and not as previously under commercial consumers. These sales amounted to 5.4 thousand tons (5, 4 and 3 star) and 5.6 thousand tons (other) in January 1968.

(3) From January 1967, all finished motor spirit with an octane number (research method) not less than 94. The figures relate to Premier grades prior to January 1967.

(4) The figures relate to Standard grades prior to January 1967.

(5) Provisional.

(¹) Before 1963 figures for paint and varnish relate to sales by manufacturers employing more than 10 persons in 1954, but from 1963 to sales by manufacturers employing 25 or more persons at the beginning of that year.

(²) From January 1963 including clear solutions and pigmented cellulose paints.

(³) From January 1963 the figures relate to spirit-based varnishes, lacquers and stains only.

(1) The iron content of home produced iron ore is about 28 per cent and of imported iron ore about 60 per cent.

(2) Excluding consumption of refined and cylinder iron made otherwise than in blast furnaces.

(3) At steel works, steel foundries and blast furnaces.

(4) At steel works and steel foundries.

(5) Ingots, metal for continuously cast blooms, billets and slabs, and metal for castings.

(6) Stocks at producers' works of alloy and non-alloy ingots, semi-finished and finished steel in terms of ingot equivalent.

(7) Including imports (and material for manufacture of drop forgings) but excluding deliveries of all materials for intra-industry conversion.

(8) 53 week period. *Average of five weeks.

(1) Characteristic products of industries in Order VI of the Standard Industrial Classification, except ordnance and small arms. Excluding deliveries by the smallest firms which are estimated to be about 2 per cent of the total. In general, spare parts supplied by manufacturers of complete machines are included with these machines, but parts, other than those separately specified, supplied for assembly by makers of complete machines are included in the heading for sub-contract sales and components.

(2) Provisional.

(¹) Including engineering and electrical goods (S.I.C. Order VI), locomotives and railway track equipment, railway carriages and wagons, heavy commercial vehicles and wheeled tractors. The index numbers (at average 1958 prices) are adjusted to allow for differences in length of calendar months but not for holidays or other seasonal variations.

(1) From 1964 onwards parts are included. (2) Excluding those for aircraft, road vehicles, wheeled and half-track tractors (other than heavy earth-moving types), fighting vehicles and heavy slow-speed engines for ship propulsion. (3) The estimated breakdown between home and export deliveries and net new orders has been revised to make the figures comparable with 1967 (when more complete information on this breakdown started to be collected). The estimates for earlier years are believed to be reasonable. (4) Between December 1964 and January 1965 there is a small increase (under 5 per cent) due to the inclusion of additional firms. (5) Provisional.

(¹) Excluding the value of work done on research and development. Including sales to H.M. Forces from the beginning of 1964. (²) Including from January 1965 electronic control equipment from the scientific instruments and apparatus industry. (³) Including from January 1965 electronic measuring and testing equipment from the scientific instruments and apparatus industry. (⁴) Transmitters (sound and vision) for public broadcasting and ancillary equipment. (⁵) Electronic heating equipment, industrial television equipment, electronic simulators and trainers and other electronic apparatus. Including from 1963 electronic instruments for nuclear application and nucleonic instruments from the scientific instruments and apparatus industry, and from 1965 other work done on electronic capital equipment. (⁶) From 1965 the coverage differs slightly from earlier years.

⁽¹⁾ Wool, hosiery (and other knitted goods), made-up clothing and the spinning, weaving and merchant converting sections of the cotton and man-made fibre industries. ⁽²⁾ The index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry and not output of that particular type of garment. ⁽³⁾ These indices have been adjusted to allow for the differences in the lengths of calendar months but not for holidays or for other seasonal variations. ⁽⁴⁾ From January 1965 the figures relate to an enlarged panel of contributors.

⁽¹⁾ Fabrics in million square yards. From January 1967 the figures include non-wool fabrics woven in the wool textile industry. ⁽²⁾ All fibres (other than virgin wool) used in woollen spinning and felting, and hair used in the making of tops. ⁽³⁾ Excluding stocks held by farmers. Annual figures are at 31 August.

(1) The figures for new orders were collected on a new basis in 1964 and adjustments have been made to some of the figures to make the series continuous and bring them into line with output figures.

(2) These figures relate to work included in the preceding columns which is to be done without a firm order.

(3) Including garages and shops.

(4) Including gas, electricity, coal-mining, railways and air transport.

⁽¹⁾ The figures relate to schemes mainly over 5,000 sq. ft. ⁽²⁾ For all projects (new buildings, extensions to existing premises and buildings converted to industrial use) for which industrial development certificates were issued. ⁽³⁾ The area of industrial building has, since mid-August 1966, been extended to include all ancillary space for storage, canteens, etc. Prior to that date ancillary space was not counted, except in Scotland, Wales and the Northern region; the figures since that date on the old basis of measurement are estimates of the area which would have been approved under the pre-August 1966 definition. ⁽⁴⁾ Provisional. ⁽⁵⁾ For manufacturing industry only (new buildings and extensions to existing premises).

(¹) Excluding building which is wholly financed from private sources. (²) From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings 'Primary and secondary' and 'Special schools'. (³) Figures for England and Wales include the value of projects for which specific approval is not required. (⁴) Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. (⁵) Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain minor projects for which specific approval is not required. (⁶) The Scottish figures of projects approved refer to approval at the sketch plan stage, which might be some six to twelve months before the start of construction. (⁷) The Scottish figures of 'Under construction' and 'Completions' are based on the tender costs. The 'Under construction' and 'Completions' figures exclude the value of approved school projects which in 1967 amounted to £1,497,000 and £59,000 respectively.

(¹) The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

(²) Including new schools brought into partial use before completion.

(³) Extensions, alterations, remodelling and war damage repairs.

(¹) The railway figures are derived from statistics compiled by the British Railways Board. The annual figures for road transport are estimated from periodic sample enquiries, traffic count data, trends in the goods vehicle population and changes in industrial output. The monthly road transport figures are estimated from traffic count data.

⁽¹⁾ The four-weekly averages for each year are computed from calendar year totals.

Source: Ministry of Transport

⁽²⁾ The reduced fares category includes statutory day returns in the London area. From 29 January 1966 full fares and reduced fares have been combined for London Transport railways. Similarly, the annual figure for 1965 has been combined, with an appropriate revision for 1964.

⁽³⁾ Season ticket journeys are calculated on the basis of 600 journeys per annum for London Transport, and 540 journeys per annum for British Railways.

⁽¹⁾ The four-weekly averages for each year are computed from calendar year totals.

⁽²⁾ Up to and including 1962 the figures are based on miles actually hauled and include free-hauled traffic except that hauled by departmental trains. From the beginning of 1963 they are based on miles charged for and exclude all free-hauled traffic.

(1) Excluding movement by land across the frontier between the Irish Republic and Northern Ireland, passengers travelling between the Channel Islands and Great Britain, passengers carried in aircraft chartered by British government departments and, as far as possible, passengers travelling by sea on pleasure cruises and day trips, and H.M. and other Armed Forces travelling in the course of their duties. Including movement to and from the privately operated airports of Southend and Ferryfield.

(2) Passengers to and from North Africa and Middle East countries have been attributed to the European continent and Mediterranean Sea area from 1960 onwards in the case of air traffic and from 1961 onwards in the case of sea traffic.

(1) Excluding deliveries of, but including payments for, U.S. military aircraft and missiles.

(2) Assets: increase —, decrease +. Liabilities: increase +, decrease —.

(3) The net total of contra entries arising from the revaluation in sterling terms of certain official monetary or banking assets and liabilities including the sterling counterpart of drawings on central bank facilities, or included to account for the fact that the pre-devaluation forward commitments of the Exchange Equalisation Account are recorded as being settled on maturity at the new parity.

(4) Includes changes in official holdings of non-convertible currencies.

(5) Changes in net liabilities in overseas sterling area currencies before 1963 form part of changes in external sterling liabilities (net).

(6) Consists of non-sterling countries and international organisations other than I.M.F.

⁽¹⁾ In addition to its lending, the National Loans Fund meets the interest and management charges of the national debt. To the extent that these charges are not matched by interest received on its own lending and by profits of the Issue Department of the Bank of England, the Consolidated Fund meets the difference. The surplus on the Consolidated Fund is paid to the Fund, leaving the differences between that and its net lending as the Fund's financing requirement.

Source: H.M. Treasury

⁽²⁾ Electricity Council, North of Scotland Hydro-Electric Board and South of Scotland Electricity Board.

⁽³⁾ British Overseas Airways Corporation, British European Airways Corporation and British Airports Authority.

⁽⁴⁾ Including Industrial Reorganisation Corporation and Shipbuilding Industry Board.

⁽⁵⁾ Including loans to harbour authorities.

⁽⁶⁾ Loans under the Ship Credit Scheme and to housing associations and building societies.

⁽⁷⁾ Loans to Votes for U.S. military aircraft, married quarters for Armed Forces and Town and County Planning compensation; and lending to Redundancy Fund, Land Commission and Northern Ireland Government.

⁽⁸⁾ Calculated on the new basis for purposes of comparison.

⁽⁹⁾ After allowing for estimated shortfall on borrowing (£120 million).

⁽¹⁾ This is equal to Exchequer borrowing and special transactions (net) less receipts from extra-Exchequer funds, etc. It is also equal to the amount the central government borrows less any increase (or plus any decrease) in its holdings of gold and currency reserves.

⁽²⁾ Calculated on the new basis for purposes of comparison.

⁽³⁾ A negative item represents a surplus, a positive item a deficit.

⁽⁴⁾ Including surrender of final balance on the local loans fund.

(¹) Including some land tax, mineral rights duty, excess profits duty and special contribution, not included under separate headings; these amounted to approximately £0.2 million in each of the financial years 1963/64 to 1966/67. (²) Receipts from excess profits tax and excess profits levy amounted to approximately £1 million in each of the years 1962/63 to 1965/66. (³) Payments due in certain cases where the overseas rate exceeds the corporation tax rate (Section 84, Finance Act 1965). The figures relate to calendar months. (⁴) The yearly totals include revisions which cannot be allocated to particular monthly periods.

	September	...										

(⁵) The sum of the twelve monthly receipts under certain headings is slightly greater than the total shown for the financial year. This is because the monthly figures include duties ultimately payable to the Isle of Man and adjustments for these are made only at the end of the financial year. (⁶) Including receipts from the 10 per cent regulator on most Customs and Excise duties and on purchase tax, operative (i) from 26 July 1961 to 9 April 1962 and (ii) from 21 July 1966 to 11 April 1967. (⁷) Including receipts from the temporary charge on imports from October 1964 to November 1966 less export rebates. (⁸) Provisional.

⁽¹⁾ Excluding securities of the British government and nationalised industries.

Source: Bank of England

⁽²⁾ The estimates include United Kingdom local authority negotiable bonds (of not less than one year) issued to or through the agency of banks, discount houses, issuing houses or brokers; these bonds were first issued in February 1964.⁽³⁾ Amounts included for issues denominated in foreign currencies have been converted at rates ruling at the time of issue.

(1) Total deposits less (i) balances with, and cheques in course of collection on, other banks in the United Kingdom and the Republic of Ireland and (ii) items in transit between offices of the same bank.

(2) Comprising (i) Coin, notes and balances with Bank of England, etc. (excluding special deposits); (ii) Money at call and short notice; (iii) Bills discounted, which include re-financeable export credits.

(3) Excluding items in transit.

(4) Figures supplied by the Bank of England and rounded to the nearest £5 million.

(5) Excluding advances to nationalised industries (including, from 28 July 1967, the British Steel Corporation).

(6) After 31 March 1966 the figures exclude the Irish business of the National Bank transferred to the new National Bank of Ireland.

(7) The figures are affected by the exclusion of advances to the nationalised steel companies (see footnote (5)).

(8) The sharp fall between May and June and sharp rise between June and July probably reflect distortion in the seasonal pattern over the half-year.

(¹) Although some headings in the new classification are the same as those in the analysis published previously by the British Bankers' Association (last published in February 1968 issue) the contents of most of these headings are by no means identical. This is mainly due to differences of coverage which result from basing the new analysis on the *Standard Industrial Classification*.

(²) The annual figures are averages of the figures for February, May, August and November.

⁽³⁾ Excluding funds placed through the specialised financial markets.

Source: Bank of England

⁽⁴⁾ The February 1968 figures are affected by the revaluation of foreign currency advances after 18 November 1967, and by the inclusion of several new contributors. Together, these accounted for some £260 million of the increase over the quarter in total advances (U.K. residents+£60 million and overseas residents+£200 million).⁽⁵⁾ Other banks includes accepting houses, overseas and other banks.⁽⁶⁾ Chemicals and allied industries included in 'other manufacturing'.

(1) Figures are not strictly comparable throughout owing to changes in the composition of the clearings. From 12 January 1968 provincial clearings, with the exception of the afternoon clearing at Liverpool, were abolished and transferred to General clearing.

(2) Average of Wednesdays. Includes Bank of England notes held by the Scottish and Northern Ireland banks as cover for their note issues in excess of the authorised circulation.

(3) Months: average of Saturdays in the consecutive four-week periods as published in *The London Gazette* or in *The Belfast Gazette*, with as close a correspondence as possible to the calendar months. Years: average of the thirteen published figures.

(4) Excluding coin in the Bank of England, Issue Department.

(5) Total notes and coin outstanding, less notes and coin held by the Bank of England, Banking Department, and by the London clearing banks, Scottish banks and Northern Ireland banks.

(¹) Derived from yield-maturity curves fitted by computer; an outline of the method used was given in the *Bank of England Quarterly Bulletin* for March 1967. Taxes are ignored. The yearly figures are averages of end month yields. The monthly figures for 1964-66 relate to the last working day and from January 1967 to averages of Wednesdays.

(²) From 1961 to 1962 stocks with coupons below 3½ per cent were omitted from the calculation of the curves; from January 1963 the limit was 4 per cent and from January 1966 5 per cent. The effect of the break between 1962 and 1963 on the annual averages is negligible; the break in January 1966 causes a drop of 0.06 per cent in the short-dated series but does not affect the medium- or long-dated series.

(³) Average of working days, based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest; tax is ignored.

(⁴) Averages of daily figures calculated from middle market closing prices.

(⁵) Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.

⁽¹⁾ This index is compiled from the results of a monthly enquiry into total wage and salary earnings. The index has been revised and a full description is given in the *Ministry of Labour Gazette* for March 1967.

⁽²⁾ The industries included in the enquiry are manufacturing, agriculture, mining, construction, gas, electricity, water, transport and communication and certain miscellaneous services. The coverage of the returns is virtually complete in gas, electricity, coalmining and rail transport. In the remaining sectors, the index is based on returns from a sample of about 7,500 firms having about 5½ million employees. In all, the returns show the earnings of about 60 per cent of the total number of employees in the industries concerned.

³) England and Wales only. (⁴) Except sea transport and postal services. The indices from October 1966 include British Road Services. (⁵) Consisting of laundries and dry cleaning, motor repairers and garages and the repair of boots and shoes. (⁶) Provisional. (⁷) The epidemic of foot and mouth disease prevented visits by Ministry of Agriculture Wages Inspectors to farms in infected and adjacent areas. For this reason there is insufficient information to enable an accurate index for Agriculture to be calculated for this month but the best possible estimate has been used in the compilation of the index for all Industries and Services.

Source: Department of
Employment
and Productivity

Note: There are fluctuations from month to month due to such factors as bonus payments, seasonal variations in hours worked, loss of overtime pay during holidays, etc. Seasonally adjusted figures for all industries covered are given in the second column of the table. Although the seasonally adjusted figures have been revised and are now based on five years data they cannot be regarded as precise. It is not yet possible to produce reliable seasonal adjustments for the individual industries.

(¹) The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income tax or insurance contributions, in one week in the months indicated. Administrative and clerical workers and other salaried persons have been excluded. Certain qualifications are given in a full account of the enquiry relating to April 1967, published in the *Ministry of Labour Gazette* for August 1967.

(²) This index relates only to the industries covered by the earnings enquiry. It should not be confused with the figures in Table 162 which cover all industries.

(³) From and including October 1967 includes (a) dock workers previously on daily or half-daily engagements and (b) postmen.

⁽¹⁾ The figures are based on rates and hours at the end of the month. An account of the method of compilation of the figures is given in the current issue of the *Employment and Productivity Gazette*.

⁽²⁾ In general, males under 21 and females under 18 years of age.

⁽³⁾ The term 'Manufacturing industries' covers all industries included in Orders III-XVI of the revised *Standard Industrial Classification*, 1958.

(¹) The figures relate to changes in basic full-time weekly rates of wages and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are, in the main, those arranged by organisations of employers and workpeople or by statutory wages councils or boards. It is estimated that 14 million workers are covered by these statistics. In general, changes arranged by individual employers are excluded.

(²) The monthly totals in the columns headed 'Increase' and 'Decrease' relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases exceeded increases, and the corresponding net amounts; the column headed 'Net increase,' is therefore the overall net increase for the year.

(³) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

(1) The weighting of the monthly index is based on the pattern of trade in 1961. The method of calculating the import and United Kingdom export unit value index was explained in the *Board of Trade Journal* for 13 September 1963.

(2) United Kingdom export unit value index as a percentage of the import unit value index.

August 20 ...												
September 17 ...												

The index of retail prices replaced the Interim index from January 1956. A new set of weights was introduced, based on ascertained consumption in 1953-54, valued at January 1956 prices. Commencing in January 1962, the weights have been revised each January on the basis of ascertained consumption in the three years ended in the previous June, valued at prices obtaining at the date of revision. The Cost of Living Advisory Committee recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121.4. Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.

These are the weights which would have been used in 1968 if expenditure on meals out had been treated as in previous years (see footnote⁽²⁾). The weights actually used are given in the following line.

⁽¹⁾ Index of building costs; figures relate to average for the quarter.⁽²⁾ Based on prices ruling on the last day of each month.⁽³⁾ London Metal Exchange mean of buyers' and sellers' prices at close of morning session.⁽⁴⁾ The index covers only dwellings on which building societies have advanced mortgages during the period. The cost of land is included.Sources: Board of Trade

(1) Based on manufacturers' list prices.

(2) The market-price series are based on prices before the addition of subsidies paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.

(3) The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies paid to producers; those for milk and eggs on prices paid to producers by the marketing boards for these commodities; and that for potatoes on producer prices, sometimes 'supported' by the Potato Marketing Board.

(4) Figures to June 1967 have been adjusted to final deficiency payments.

(5) Maincrop potatoes only.

(6) Based on guaranteed minimum prices to producers at packing station until March 1966, then on B.E.M.B. prices to producers under the Egg Contract Schemes.

(7) Based on net prices to farmers after deduction of subsidy.

⁽¹⁾ Great Britain. Figures until June 1959 were based on quarterly returns from virtually all cinemas. From July 1959 onwards, figures were estimates based on information relating to a sample of cinemas. From April 1967, figures are based on four-weekly returns submitted regularly to H.M. Customs and Excise by cinemas responsible for approximately 94 per cent of total takings with an estimate for the remainder of the cinemas, which are exempt from four-weekly returns. This estimate is based on an annual Board of Trade inquiry.

⁽²⁾ Manufacturers' sales exclusive of purchase tax.

⁽³⁾ Including medium play and a small number of other types.

*Average of five weeks.

⁽¹⁾ Daily mean air temperature at sea-level.

⁽²⁾ To convert °Centigrade into °Fahrenheit: multiply by 9, divide by 5, and add 32.
°Fahrenheit into °Centigrade: subtract 32, multiply by 5, and divide by 9.

⁽³⁾ 1 inch = 25.400 millimetres.
1 millimetre = 0.0394 inches.

CENTRAL STATISTICAL OFFICE

STATISTICAL NEWS

No. 2 AUGUST 1968

The purpose of this quarterly publication is to put the user of statistics in touch with all that is going on in the world of official statistics. Each issue contains two or three main articles treating selected topics in depth and shorter Notes report what is new in official statistics. A cumulative index of the contents makes the book a most useful reference source.

In the first issue, which appeared in May, Professor Moser, the Director of the Central Statistical Office, discussed the future role of the Central Statistical Office. Mr. J. Stafford, Director of Statistics at the Board of Trade, wrote about a new Business Statistics Office and Mr. W. F. F. Kemsley of the Government Social Survey explained changes in the sample design of the Family Expenditure Survey.

The August issue contains three new articles. The first, by Mr. R. F. Fowler, Director of Statistical Research in the Department of Employment and Productivity, discusses Duration of Unemployment. Another article by Mr. H. E. Bishop of the Central Statistical Office, deals with Scientific Manpower. The third main article is by Dr. A. T. Park of the Ministry of Finance and describes Northern Ireland Government Statistics.

In addition to the main articles each issue contains about 50 shorter notes.

Price per copy 6s. 0d. (by post 6s. 6d.)
